

mastery **PRO** Adult Breed with Chicken

The real daily ration (R) will be calculated by multiplying the suggested daily feeding recommendations  by the C1 and C2 coefficients.

| CLIMATIC FACTOR | C1 | BEHAVIOURAL FACTOR | C2 |
|---|------|--------------------------|-----|
| T° > 30 °C | 1,1 | Very quiet cats | 0,8 |
| T° ≈ 20 °C | 1 | Quiet cats | 0,9 |
| T° ≈ 10 °C | 1,1 | Cat with normal activity | 1 |
| T° ≈ 0 °C | 1,25 | Active cats | 1,1 |
| T° ≈ - 10 °C | 1,5 | Hyperactive cats | 1,2 |
| R =  X C1 X C2 | | | |

FEEDING INSTRUCTIONS :

|  | |
|--|-------|
| 2 kg | 30 g |
| 3 kg | 45 g |
| 4 kg | 55 g |
| 5 kg | 70 g |
| 6 kg | 85 g |
| 7 kg | 100 g |
| 8 kg | 110 g |
| 9 kg | 125 g |
| 10 kg | 140 g |

For the gestating female cat, continue to distribute this food into 2 daily meals during the first half of gestation when the female cat's needs are close to those of maintenance. From the 35th day of gestation choose the **mastery PRO BABY & MUMMY** food.

For neutered cats, choose the **mastery PROTECTION CONCEPT ADULT** food.

For senior cats, choose the **mastery PROTECTION CONCEPT SENIOR LONGEVITY** food.
